PART 4. -- SUPPLY

PART 5. -- FISCAL AND TRANSPORTATION

PART 6. -- MAINTENANCE

601. DELAYS IN RECEIPT OF OIL ANALYSIS SAMPLES.

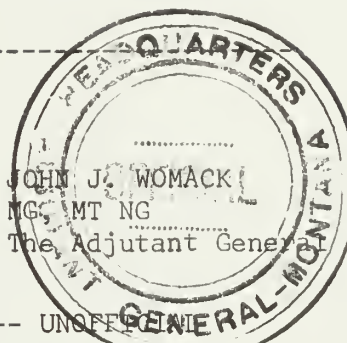

1. Oil samples are taking as long as 38 days from date taken until the date they reach the lab due to practice of accumulating samples to ship in large containers. This contrary to instructions contained in TB 43-0210, para 70. Samples should be mailed individually by first class mail.

2. In the past few months, several detectable engine failures have occurred during the extended transit time caused by the delayed dispatch. In all of these cases, the lab detected the problem on receipt and could have prevented the failure if the sample had been received on time.

3. The forthcoming change to TB 43-0210 will specify the use of a "zip lock" plastic bag NSN 8105-00-837-7754 placed inside the "jiffy" mail sack to avoid possibility of oil spillage and eliminate the need for the large containers.
